

TESTING ASSIGNMENT

IDBI Bank – Online Account / Callback Application Form

Test Scenarios | Test Cases | Defect Reports

Application under test: apps.idbibank.in/apply-now-inc.asp
Date: 02-07-2026

Requirement Overview

The IDBI Bank application under test allows a visitor to request a callback / apply for a product online by submitting personal and contact details. The form captures customer status, title, name, age, mobile/phone number, email ID, preferred contact time, nearest branch (state/city/branch), product required, and a CAPTCHA verification code, and requires NDNC authorization consent before submission.

This document contains the three deliverables required for the assignment:

- Deliverable 1 – Test Scenarios covering the application's fields and behaviour.
- Deliverable 2 – Detailed Test Cases written using standard testing techniques (Equivalence Partitioning, Boundary Value Analysis, and Error Guessing).
- Deliverable 3 – Defect Reports, including the defects specified in the assignment requirement as well as additional defects actually identified while testing the live application, supported by screenshot evidence.

Deliverable 1: Test Scenarios

Scenario ID	Test Scenario
TS_01	Verify Title dropdown displays valid options and is mandatory
TS_02	Verify First Name field accepts only alphabetic characters
TS_03	Verify Last Name field accepts only alphabetic characters
TS_04	Verify Name field(s) reject numeric and special characters
TS_05	Verify Age dropdown displays correct age-range values and is mandatory
TS_06	Verify Mobile Number field accepts only 10-digit numeric values
TS_07	Verify Mobile Number field rejects alphabetic and special characters (e.g. comma, dot)
TS_08	Verify Mobile Number field rejects values with less/more than 10 digits
TS_09	Verify optional STD/Phone Number field behaviour when left blank
TS_10	Verify Email ID field accepts a valid email format
TS_11	Verify Email ID field rejects an invalid email format
TS_12	Verify Preferred Contact Time dropdown is mandatory and shows correct slots
TS_13	Verify Nearest IDBI Bank Branch (State/City/Branch) cascading dropdowns are mandatory
TS_14	Verify form behaviour when Branch details are left unselected and Submit is clicked
TS_15	Verify Product Required list box allows multiple selection using Ctrl key
TS_16	Verify Product Required list box is mandatory
TS_17	Verify CAPTCHA image can be refreshed using the 'Change Image' link
TS_18	Verify CAPTCHA textbox validates the entered code against the displayed image
TS_19	Verify form shows an error when an incorrect CAPTCHA is submitted
TS_20	Verify NDNC authorization checkbox can be checked/unchecked and is mandatory
TS_21	Verify Submit button validates all mandatory fields before submission
TS_22	Verify data entered is retained if validation fails on Submit
TS_23	Verify successful submission with all valid data and correct CAPTCHA
TS_24	Verify Reset button clears all entered data

Deliverable 2: Test Cases

Test cases below are derived using Equivalence Partitioning (EP), Boundary Value Analysis (BVA) and Error Guessing, focusing on the Mobile Number, Branch selection and CAPTCHA fields where actual defects were later found during exploratory testing, along with core mandatory-field coverage.

TC ID	Scenario Ref.	Technique	Test Steps	Test Data	Expected Result	Status
TC_01	TS_02	EP – Valid Class	Enter value in First Name field	"Naveen"	Value is accepted; only alphabets allowed	Pass
TC_02	TS_04	EP – Invalid Class	Enter numeric value in First Name field	"Naveen123"	System should reject numbers / show validation error	Fail (accepted)
TC_03	TS_06	BVA – Valid Boundary	Enter a 10-digit mobile number	"7007751458"	Value is accepted	Pass
TC_04	TS_08	BVA – Invalid Boundary	Enter a 9-digit mobile number	"700775145"	System should reject / show validation error	Not Verified
TC_05	TS_08	BVA – Invalid Boundary	Enter an 11-digit mobile number	"70077514589"	System should reject / show validation error	Not Verified
TC_06	TS_07	Error Guessing	Enter special characters in Mobile Number field	"89,,384951"	Field should accept only digits 0–9; comma/dot should be blocked	Fail (Defect BUG-001)
TC_07	TS_07	Error Guessing	Enter a value with a dot in Mobile Number field	"98.76543210"	Field should accept only digits 0–9; dot should be blocked	Fail (Defect BUG-001)
TC_08	TS_10	EP – Valid Class	Enter a valid email address	"naveenppandey8080@gmail.com"	Value is accepted	Pass
TC_09	TS_11	EP – Invalid Class	Enter an email address without '@' symbol	"testgmail.com"	System should reject / show validation error	Not Verified
TC_10	TS_14	Error Guessing	Fill all mandatory fields except State/City/Branch and click Submit	See Fig. 2 (blank branch fields)	Validation message such as 'Please Select State/City/Branch' should be shown; page should not refresh; data should be retained	Fail (Defect BUG-002 / BUG-003)
TC_11	TS_16	EP – Valid Class	Select a single item from Product Required list box	"Education Loan"	Item is selected and highlighted	Pass
TC_12	TS_15	EP – Valid Class	Select multiple items using Ctrl + click	"Credit Card" + "Education Loan"	Both items are selected simultaneously	Not Verified

TC ID	Scenario Ref.	Technique	Test Steps	Test Data	Expected Result	Status
TC_13	TS_17	Functional	Click the 'Change Image' hyperlink next to CAPTCHA	N/A	A new CAPTCHA image/code is displayed	Pass
TC_14	TS_19	Error Guessing	Enter an incorrect CAPTCHA code and click Submit	Displayed code: "K6D428"; Entered: "K6D42"	Application should show an appropriate CAPTCHA error message, not proceed as successful	Not Verified
TC_15	TS_20	Functional	Leave NDNC authorization checkbox unchecked and click Submit	N/A	Validation message should prompt user to authorize contact	Not Verified
TC_16	TS_23	Functional – Positive	Fill all fields correctly with valid data and correct CAPTCHA, click Submit	Valid data set	'Submission Successful' message is displayed on next page	Not Verified

Deliverable 3: Defect Reports

3.1 Defect Descriptions – As Specified in the Assignment Requirement

The assignment requirement asks for the defect description to be logged for the following three given cases. These are documented below in standard defect-report format so that a developer can understand and reproduce each issue.

Defect ID: DEF-A01 — Services Required list box: no selection accepted without error

Module: Application Form – Services/Product Required Section

Severity: High

Priority: High

Environment: Browser: Google Chrome | OS: Windows 11

Precondition: User is on the application form with the Services/Product Required field visible

Steps to Reproduce: 1) Open the application form. 2) Fill all other mandatory fields with valid data. 3) Do not select any item in the 'Services Required' list box. 4) Click the Submit button.

Expected Result: Since 'Services Required' is a mandatory field, the application should display an appropriate error message (e.g. 'Please select a service') and prevent submission.

Actual Result: The application does not display any error message when no item is selected in the 'Services Required' list box, and the form proceeds without validating this mandatory field.

Severity Justification: A mandatory field can be bypassed, allowing incomplete/invalid data to be submitted; this affects data integrity for the business.

Status: Open

Defect ID: DEF-A02 — Incorrect CAPTCHA accepted; 'Submission Successful' shown

Module: Application Form – CAPTCHA Verification

Severity: Critical

Priority: High

Environment: Browser: Google Chrome | OS: Windows 11

Precondition: User is on the application form with a CAPTCHA image displayed

Steps to Reproduce: 1) Open the application form. 2) Fill all mandatory fields with valid data. 3) In the 'Enter the code exactly as displayed' textbox, enter characters that do NOT match the displayed CAPTCHA image. 4) Click the Submit button.

Expected Result: The application should validate the CAPTCHA input against the displayed image and reject the submission with an error message such as 'Incorrect code entered, please try again' if the values do not match.

Actual Result: The application accepts the incorrect CAPTCHA value and displays the 'Submission Successful' message on the next page, indicating that CAPTCHA validation is not being enforced.

Severity Justification: This is a security control failure — CAPTCHA exists specifically to block automated/bot submissions; if it is not enforced, the form is vulnerable to spam and automated abuse.

Status: Open

Defect ID: DEF-A03 — No response after submitting valid details

Module: Application Form – Submit Action

Severity: Critical

Priority: High

Environment: Browser: Google Chrome | OS: Windows 11

Precondition: User has filled the application form correctly

Steps to Reproduce: 1) Open the application form. 2) Enter all valid details in every field, including a correctly entered CAPTCHA code. 3) Click the Submit button.

Expected Result: On submitting valid details, the application should process the request and display the 'Submission Successful' confirmation message on the next page.

Actual Result: After clicking Submit, the application does not respond — no confirmation message, error message, or page navigation occurs, leaving the user unsure whether the request was received.

Severity Justification: A core business transaction (lead/callback submission) silently fails, resulting in lost leads and a broken user journey with no feedback to the customer.

Status: Open

3.2 Additional Defects Identified During Live Testing

While exploring the live application at apps.idbibank.in/apply-now-inc.asp, the following three defects were actually observed and reproduced. Screenshots are attached as evidence for each.

Bug ID: BUG-001 — Mobile Number field accepts special characters (comma and dot)

Title: Mobile Number field accepts special characters (comma and dot)

Module: Callback Application Form

Severity: Medium

Priority: Medium

Environment: OS: Windows 11 | Browser: Google Chrome

Precondition: Open the IDBI Bank callback application form

Steps to Reproduce: 1) Open the application form. 2) Navigate to the Mobile Number field. 3) Enter '89,,384951' or '98.76543210'. 4) Move to another field or attempt to submit the form.

Expected Result: The Mobile Number field should accept only numeric digits (0–9). Special characters such as comma (,) or dot (.) should either be blocked while typing or trigger a validation error.

Actual Result: The Mobile Number field accepts special characters such as comma (,) and dot (.).

Status: Bug Identified

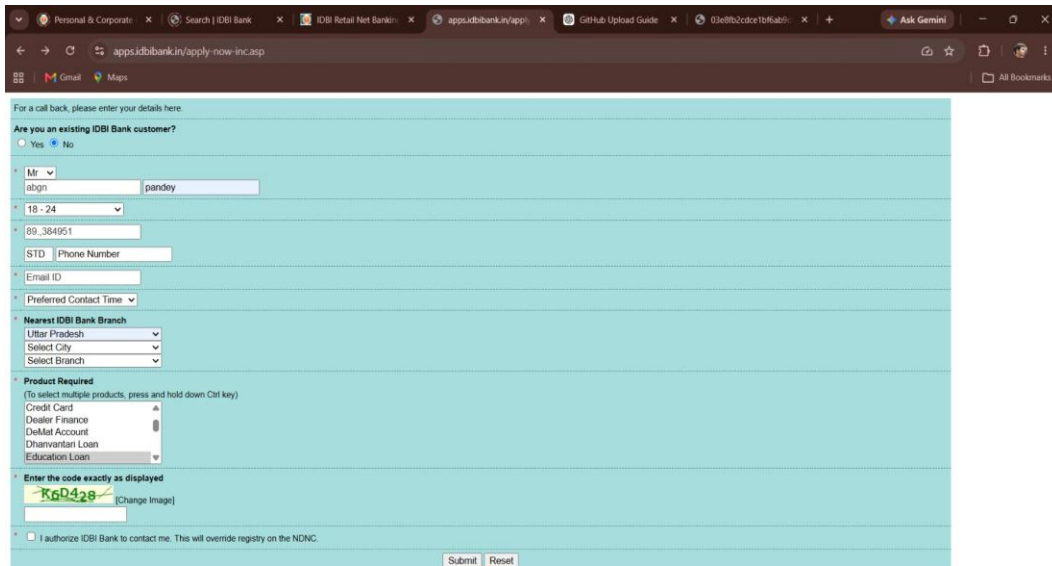

A screenshot of a web browser displaying the IDBI Bank callback application form. The form is titled "For a call back, please enter your details here." and includes several fields: "Are you an existing IDBI Bank customer?" (radio buttons for Yes/No), "Mr." (dropdown), "Name" (text input with "pandey"), "18-24" (dropdown), "89,,384951" (text input for Mobile Number), "STD" and "Phone Number" (text inputs), "Email ID" (text input), "Preferred Contact Time" (dropdown), "Nearest IDBI Bank Branch" (dropdowns for "Uttar Pradesh", "Select City", and "Select Branch"), "Product Required" (dropdown with options: Credit Card, Dealer Finance, DeMat Account, Dharmvantari Loan, Education Loan), "Enter the code exactly as displayed" (text input with "K6Q428" and a "Change Image" link), and a checkbox for "I authorize IDBI Bank to contact me. This will override registry on the NDNC." The "Submit" and "Reset" buttons are at the bottom right.

Figure 1: Mobile Number field accepts "89,,384951" as input, which should not be allowed.

Bug ID: BUG-002 — Form refreshes instead of displaying validation message when Branch details are not selected

Title: Form refreshes instead of displaying validation message when Branch details are not selected

Module: Callback Request Form

Severity: Medium

Priority: Medium

Environment: Browser: Google Chrome | OS: Windows 11

Precondition: Open the IDBI Bank callback request form

Steps to Reproduce: 1) Open the application form. 2) Fill the following fields: Existing Customer, Title, First Name, Last Name, Age, Mobile Number, Email ID, Preferred Contact Time. 3) Leave the Nearest IDBI Bank Branch fields (State/City/Branch) unselected. 4) Click Submit.

Expected Result: The application should display a validation message such as 'Please Select State', 'Please Select City', or 'Please Select Branch'. The page should not refresh until the mandatory fields are completed.

Actual Result: The page refreshes without displaying a validation message for the missing branch information.

Status: Open

The screenshot shows a web browser window with the URL 'app.idbibank.in/apply-now-inc.asp'. The form is titled 'For a call back, please enter your details here.' and contains the following fields:

- Are you an existing IDBI Bank customer?** (Radio buttons: Yes, No)
- Mr.** (Dropdown menu)
- First Name** (Text input: naveen)
- Last Name** (Text input: pandey)
- Age** (Dropdown menu: 25 - 34)
- Mobile Number** (Text input: 7007751458)
- STD** (Text input)
- Phone Number** (Text input)
- Email** (Text input: naveenpandey8080@gmail.com)
- Preferred Contact Time** (Dropdown menu: 10 AM - 12 PM)
- Nearest IDBI Bank Branch** (Dropdown menu: Uttar Pradesh)
- Select City** (Dropdown menu)
- Select Branch** (Dropdown menu)
- Product Required** (Text input: To select multiple products, press and hold down Ctrl key)
- Product Type** (Dropdown menu: Credit Card, Dealer Finance, DeMat Account, Dharmawanti Loan, Education Loan)
- Enter the code exactly as displayed** (Text input: 3G6XN1)
- Enter the code exactly as displayed** (Text input: 3G6XN1)
- Enter the code exactly as displayed** (Text input: 3G6XN1)

The form is filled with data except for the branch details, which are unselected. The form is titled 'For a call back, please enter your details here.' and includes a 'Submit' button.

Figure 2: Form filled with all fields except Branch details; no validation message is shown on Submit.

Bug ID: BUG-003 — Form refreshes and clears all entered data instead of displaying validation message when Branch details are not selected

Title: Form refreshes and clears all entered data instead of displaying validation message when Branch details are not selected

Module: Callback Request Form

Severity: High

Priority: High

Environment: Application: IDBI Bank Callback Form | Browser: Google Chrome | OS: Windows 11

Precondition: User is on the Callback Request Form

Steps to Reproduce: 1) Open the Callback Request Form. 2) Fill all mandatory fields up to Preferred Contact Time. 3) Leave the Nearest IDBI Bank Branch fields (State, City, and Branch) empty. 4) Fill the CAPTCHA and any other required fields. 5) Click the Submit button.

Expected Result: The application should display a validation message such as 'Please Select State', 'Please Select City', or 'Please Select Branch'. The page should not refresh, and all previously entered data should be retained.

Actual Result: The page refreshes instead of displaying a validation message. All previously entered user data is cleared, and the user must fill the entire form again.

Severity Justification: This issue causes data loss and a poor user experience because users have to re-enter all information after the page refreshes.
