

MANUAL TESTING ASSIGNMENT

IDBI Bank – “Help Us Contact You” Form

Test Scenarios · Test Cases · Defect Reports

Submitted By	Naveen Pandey
Application Under Test	IDBI Bank Website – “Help Us Contact You” Enquiry Form
Testing Type	Manual Functional Testing
Deliverables	20 Test Scenarios, 5 Test Cases, 3 Defect Reports

Contents

- 1. Testing Approach (Steps 1–5)
- 2. Deliverable 1 – Test Scenarios (TS001–TS020)
- 3. Deliverable 2 – Test Cases (TC001–TC005)
- 4. Deliverable 3 – Defect Reports (BUG001–BUG003)
- 5. Conclusion

1. Testing Approach

Step 1: Requirement Analysis

- Read the requirement of the “Help Us Contact You” form carefully.
- Identify all input fields and their validations (Name, Age, Location, Contact Number, Email, Pincode, Services Required, CAPTCHA, Authorization checkbox).
- Understand which fields are mandatory and which are optional.
- Understand the expected system behaviour on successful and unsuccessful submission.

Step 2: Identify Test Scenarios

- Prepare scenarios for page load and form display.
- Prepare scenarios for Name, Age, Location, Contact Number, Email and Pincode fields.
- Prepare scenarios for Services Required, CAPTCHA, Authorization checkbox and Submit button.

Step 3: Prepare Test Cases

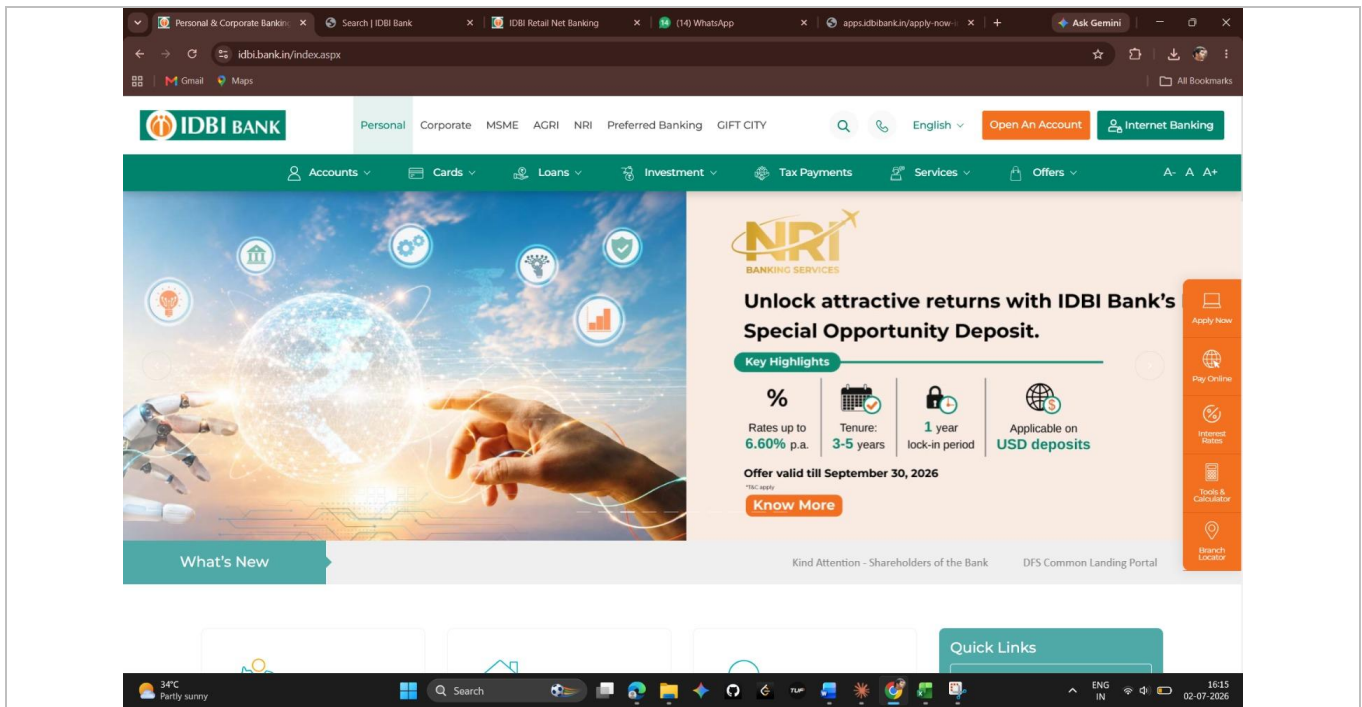

- Write positive and negative test cases for the key form fields.
- Use Boundary Value Analysis and Equivalence Partitioning where applicable (e.g. Age, Contact Number, Pincode).
- Define the Expected Result for every test case.

Step 4: Execute Testing & Log Defects

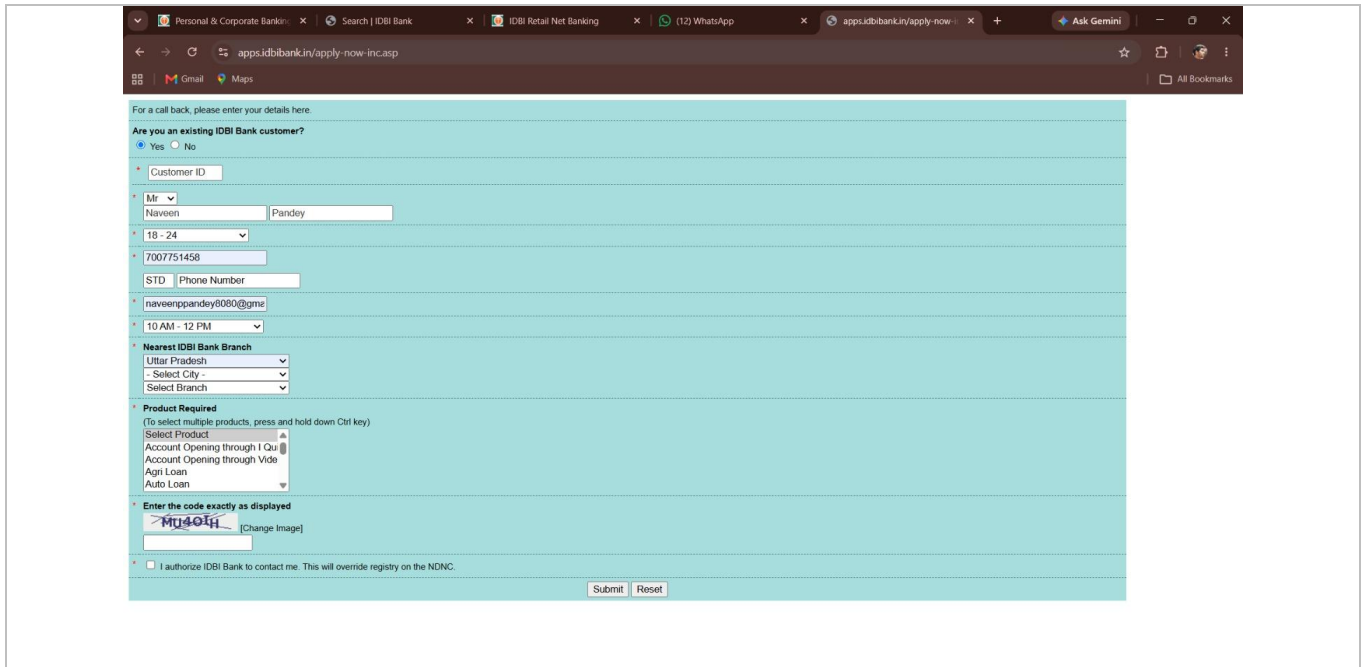

- Execute all test cases against the live form.
- Capture a screenshot of every failed test.
- Record Expected Result vs Actual Result.
- Assign Severity and Priority to each defect.

2. Deliverable 1 – Test Scenarios

The table below lists 20 test scenarios (TS001–TS020) covering page load, Name, Age, Location, Contact Number, Email, Pincode, Services Required, CAPTCHA, the Authorization checkbox, and Submit validations.

TS ID	Test Scenario	Field / Module
TS001	Verify the IDBI Bank Home Page loads successfully within acceptable time.	Page Load
TS002	Verify the 'Help Us Contact You' form is displayed with all required fields.	Page Load
TS003	Verify the Name field is mandatory and shows an error when left blank.	Name
TS004	Verify the Name field accepts valid alphabetic input (with spaces).	Name
TS005	Verify the Name field rejects numeric and special-character input.	Name
TS006	Verify the Age field is mandatory and shows an error when left blank.	Age
TS007	Verify the Age field accepts valid numeric values within an acceptable range.	Age
TS008	Verify the Age field rejects negative numbers, zero, and non-numeric input.	Age
TS009	Verify the Location/State field is mandatory and shows an error when left blank.	Location
TS010	Verify the Location dropdown lists all valid states/cities.	Location
TS011	Verify the Contact Number field is mandatory and shows an error when left blank.	Contact Number
TS012	Verify the Contact Number field accepts a valid 10-digit mobile number.	Contact Number
TS013	Verify the Contact Number field rejects entries that are less/more than 10 digits or contain letters/special characters.	Contact Number
TS014	Verify the Email field is mandatory and shows an error when left blank.	Email
TS015	Verify the Email field accepts a properly formatted email address.	Email
TS016	Verify the Email field rejects an improperly formatted email address (e.g., missing '@' or domain).	Email
TS017	Verify the Pincode field accepts a valid 6-digit numeric pincode and rejects invalid/incomplete entries.	Pincode
TS018	Verify the Services Required field is mandatory and allows selection of one or more services.	Services
TS019	Verify the CAPTCHA field validates correct input and rejects incorrect/blank CAPTCHA entries before submission.	CAPTCHA

TS ID	Test Scenario	Field / Module
TS020	Verify the Authorization checkbox is mandatory and the Submit button only proceeds when all validations pass.	Authorization / Submit

3. Deliverable 2 – Test Cases

Five detailed test cases were derived from the scenarios above, covering both positive and negative flows.

TC001: Valid Submission

Precondition	User is on the 'Help Us Contact You' form.
Test Steps	1. Enter a valid Name.2. Enter a valid Age.3. Select a valid Location.4. Enter a valid 10-digit Contact Number.5. Enter a valid Email address.6. Enter a valid 6-digit Pincode.7. Select at least one Service Required.8. Enter the correct CAPTCHA.9. Check the Authorization checkbox.10. Click Submit.
Test Data	Name: Rohit Sharma Age: 29 Contact: 9876543210 Email: rohit.sharma@example.com Pincode: 400001
Expected Result	Form is submitted successfully and a confirmation message is displayed.
Priority	High

TC002: Name Field Validation

Precondition	User is on the 'Help Us Contact You' form.
Test Steps	1. Enter numbers/special characters in the Name field (e.g. 'Rohit123!').2. Fill remaining fields with valid data.3. Click Submit.
Test Data	Name: Rohit123!
Expected Result	System should display a validation error and prevent submission until a valid Name is entered.
Priority	Medium

TC003: Contact Number Validation

Precondition	User is on the 'Help Us Contact You' form.
Test Steps	1. Enter an invalid Contact Number (less than 10 digits or containing letters).2. Fill remaining fields with valid data.3. Click Submit.
Test Data	Contact Number: 98765
Expected Result	System should display a validation error such as 'Enter a valid 10-digit mobile number' and prevent submission.
Priority	High

TC004: Invalid Email Validation

Precondition	User is on the 'Help Us Contact You' form.
Test Steps	1. Enter an improperly formatted email address.2. Fill remaining fields with valid data.3. Click Submit.
Test Data	Email: rohit.sharma@com

Expected Result	System should display a validation error such as 'Enter a valid email address' and prevent submission.
Priority	Medium

TC005: Mandatory Services Required Validation

Precondition	User is on the 'Help Us Contact You' form.
Test Steps	1. Leave the Services Required field unselected.2. Fill remaining fields with valid data.3. Click Submit.
Test Data	Services Required: (none selected)
Expected Result	System should display a validation error prompting the user to select at least one service, and should prevent submission.
Priority	High

4. Deliverable 3 – Defect Reports

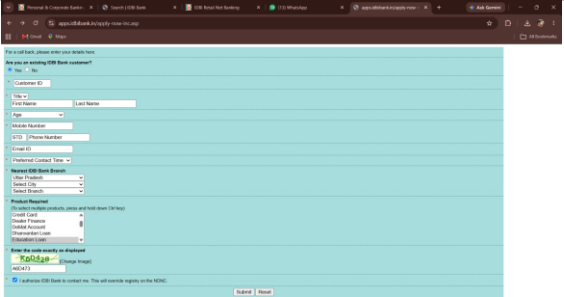

Three defects were logged during execution of the test cases above, each with steps to reproduce and supporting screenshots.

BUG-001: Services Required Field Not Validated

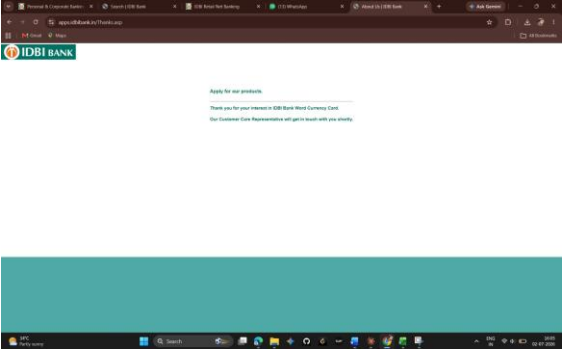

TS_018	Verify Services Required Field	To verify that the system validates the Services Required field and shows an error if left blank.
--------	--------------------------------	---

STEP 5 – DEFECT REPORTS (WITH SNAPSHOTS)

Bug ID	BUG-001
Title	Form submitted despite 'Services Required' unselected
Module	Enquiry Form
Severity	High
Priority	High
Environment	Windows 10, Chrome 124
Steps to Reproduce	1. Fill all fields except Services Required 2. Services Required unselected. 3. Observe no error message displayed.
Actual Result	System allows submission with missing selection.
Expected Result	A validation error should be shown if 'Services Required' is not selected.
Status	Open

Step 1: Form filled, Services Required left blank

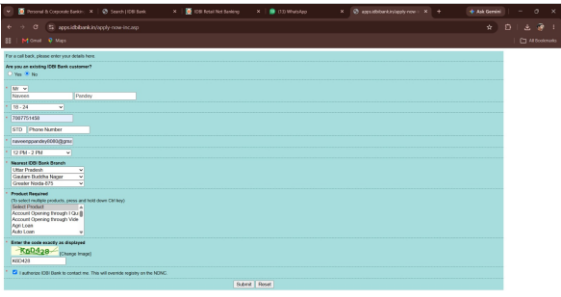

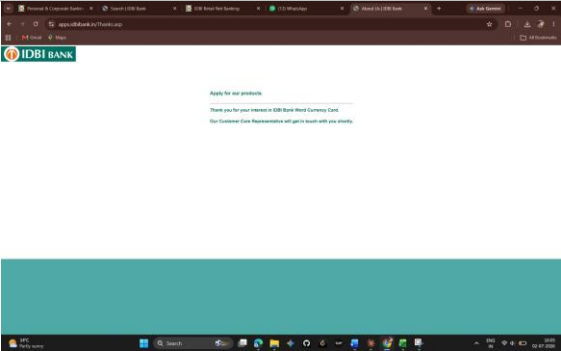

Step 2: Confirmation shown despite missing selection

- Fill all fields, leave Services Required unselected.
- Click Submit.
- Expected: Validation error.
- Actual: No validation shown.
- Severity: High

BUG-002: Incorrect CAPTCHA Accepted

TS_019	Verify CAPTCHA Validation	To verify that the system validates the CAPTCHA and rejects incorrect entries before submission.
--------	---------------------------	--

STEP 5 – DEFECT REPORTS (WITH SNAPSHOTS)

		 <i>Step 1: Incorrect CAPTCHA entered (K6D428 → A6D473)</i>  <i>Step 2: Confirmation shown despite wrong CAPTCHA</i>	
Bug ID	BUG-002		
Title	Form accepts submission even if CAPTCHA is incorrect		
Module	Enquiry Form		
Severity	Critical		
Priority	Critical		
Environment	Windows 10, Chrome 124		
Steps to Reproduce	1. Fill all mandatory fields with valid data. 2. Enter an incorrect CAPTCHA value. 3. Click Submit. Expected: CAPTCHA error message is shown.		
Actual Result	Form is submitted successfully despite the wrong CAPTCHA.		
Expected Result	System should reject the submission with the message 'CAPTCHA does not match' error.		
Status	Open		

- Fill all fields with valid data.
- Enter an incorrect CAPTCHA value and click Submit.
- Expected: CAPTCHA error message.
- Actual: Form submitted successfully.
- Severity: Critical

BUG-003: Submit Button Unresponsive

TS_020	Verify Submit Button Functionality	To verify that the system submits the form and returns a confirmation when fully valid data is entered.
--------	------------------------------------	---

STEP 5 – DEFECT REPORTS (WITH SNAPSHOTS)

Bug ID	BUG-003	 <i>Step 1: Valid data entered, ready to submit</i>  <i>Step 2: Same page shown after clicking Submit – no response</i>	
Title	Submit button does not respond data		
Module	Enquiry Form		
Severity	Critical		
Priority	Critical		
Environment	Windows 10, Chrome 124		
Steps to Reproduce	1. Fill all fields with valid data, Required and CAPTCHA. 2. Check checkbox. 3. Click Submit. 4. Observe response.		
Actual Result	No confirmation message or redirect after clicking Submit.		
Expected Result	System should submit the form and show a confirmation message.		
Status	Open		

- Fill all fields with valid data, including CAPTCHA.
- Click Submit.
- Expected: Confirmation message received.
- Actual: No response from the system.
- Severity: Critical

5. Conclusion

Manual functional testing of the IDBI Bank 'Help Us Contact You' form was carried out using 20 test scenarios and 5 detailed test cases covering page load, field-level validations, mandatory checks, CAPTCHA verification, and form submission.

Three defects were identified during execution:

- BUG001 (High): The Services Required field can be left unselected without any validation error.
- BUG002 (Critical): The form accepts submission even when an incorrect CAPTCHA is entered.
- BUG003 (Critical): The Submit button does not respond when the form is filled with fully valid data.

These defects should be prioritized for a fix, as they directly affect data integrity (BUG001), form security (BUG002), and the core submission functionality (BUG003) of the enquiry form.
